

The Wind Institute

Message of 2017

January 11, 2017

The Wind Institute will continue the *Breathing Product* in 2017. The purpose of the *Breathing Product* is to promote action and growth in fundamental life, and to inspire progress in pursuit of value and hope.

The Wind Institute will build a system of learning, rooted in honesty and responsibility, by hosting artistic events, sponsoring academic research programs and conferences, and encouraging the sharing of knowledge and information, as it is stated in the agreement of The Wind Institute.

The Wind Institute believes that these needs must be met in today's era, and will be the foundation to answers of questions for following generations.

Thank you,

The Wind Institute
